## Trade Away Disclosure for Period of January 1, 2026 – March 31, 2026

The information in this document is supplemental to the material provided in the advisory program disclosure brochures for *Benjamin F. Edwards & Co* and *Benjamin F. Edwards Wealth Management* (collectively “BFE”), which are [available on our website](#). This information is intended for clients who participate, or are considering participating, in BFE’s advisory programs which involve the use of third-party asset managers (Managers). It is intended to provide a general idea of the frequency, if any, of “step out” trades performed by the Managers BFE sponsors, as well as a summary of costs associated with the step out trades.

Step out trading occurs when Managers execute trades away from BFE’s primary custodians and/or clearing firms. Managers may choose to do this for a variety of reasons including to fulfil their obligation to seek the best execution for their clients’ orders, or to access better liquidity. This document is designed to provide insight into each Manager’s practices so that clients may make informed decisions as to whether to participate in the managed programs Benjamin F. Edwards sponsors.

All of the data provided herein was supplied directly by the respective Manager. The level of detail provided by Managers varies and BFE has not independently verified this information. BFE makes regular inquiries with the Managers it sponsors and will update this information from time to time. If a Manager does not respond to BFE’s inquiries, that Manager’s information will not be included in this document.

For more information, please see our advisory [program disclosure brochures](#) or contact your Benjamin F. Edwards financial advisor.

<b>If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details</b>	We execute trades exclusively through our broker-dealer, ensuring 100% of transactions are handled directly, which allows us to offer best execution without the imposition of mark-ups, markdowns, or commissions. Belle Haven operates as both a fully registered broker-dealer and a registered investment advisor. By leveraging our own broker-dealer, we gain direct access to the wholesale market, which enables us to bypass the inefficiencies of sourcing bonds through multiple intermediaries that typically charge mark-ups or markdowns. This streamlined approach eliminates the middleman, enhancing efficiency and improving cost-effectiveness. As a result, we can generate alpha more effectively, without relying solely on elevated credit or interest rate risk, capitalizing on the inherent inefficiencies of the fixed income space.

When looking to execute fixed income security trades for client accounts, Dana portfolio managers review a multitude of factors in determining which broker dealer to place fixed income transactions through. While execution costs are an important consideration in any transactions, most transaction decisions are based upon a combination of price / yield as well as other relevant security attributes that are largely based on the idiosyncratic characteristics of the specific securities. Whether executing the purchase or sale of a fixed income security, Dana will attempt to contact multiple institutional fixed income brokers/dealers to begin "negotiating" the purchase or sale of the security. Many fixed income securities transacted in by Dana are unique in nature and are often not offered for sale (or purchase) directly by Sponsored Programs, so therefore Dana relies more heavily on the combination of price / yield comparisons between competing institutional broker/dealer firms. No additional fees or costs are incurred when trading away.

<b>If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details</b>	Trading away (i.e., step outs) has many advantages, including, without limitation, less price dispersion across all of our client accounts by allowing us to bunch executions, limiting exposure to information leakage and high frequency traders, and allowing us to be more nimble in our trading, thereby avoiding potential delay costs. Managing a single block improves our ability to achieve better execution than can be accomplished through a series of small transactions with multiple sponsor firms. Therefore, we view step out trading as a critical process for seeking best execution.

<b>If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details</b>	<p>Consistent with its obligation to seek best execution, Loomis Sayles executes virtually all fixed income trades through broker-dealers other than the managed account program sponsor. Loomis Sayles participates in multiple managed account programs and also manages institutional and other “non-SMA” accounts, and it is responsible for identifying bonds that best fit its fixed income taxable and municipal bond strategies. When deemed to be in the best interests of its clients, orders for the same security are combined or “batched” to obtain more favorable execution including better pricing and enhanced investment opportunities than would otherwise be available if such orders were not aggregated.</p> <p>In order to satisfy its obligation to seek best execution, Loomis Sayles selects broker-dealers which it believes have the ability to achieve the most favorable net price and execution for transactions under the circumstances. The firm trades with over 100 fixed income dealers. Both qualitative and quantitative criteria are used to evaluate and select between the various dealers that are capable of executing a trade. Execution considerations may include the size and breadth of the market for the security; size and difficulty of executing and order; block positioning; net price; quality of execution, market intelligence and knowledge regarding trading activity; reliability, willingness and ability to commit capital; willingness to execute difficult transactions; financial strength; and maintaining confidentiality and anonymity of trading activity. Loomis Sayles does not execute trades through affiliates.</p> <p>Loomis Sayles is responsible for identifying bonds that best fit its municipal bond and taxable fixed income strategies. Every bond that trades in the market has a “bid/ask spread.” When Loomis Sayles steps out a trade for a bond to a dealer, it is buying the bond for the client at the “ask” price and selling the bond at the “bid” price. The difference between the “bid” and “ask” prices is the “spread.” This spread which is imbedded in the net price and is not disclosed by the dealer, could be viewed as an additional imbedded cost that a client may incur. However, the client would incur this spread regardless of whether Loomis Sayles steps out the trade to another dealer or executes the trade through sponsor/custodian.</p>

<b>If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details</b>	Trades away do not incur any additional costs and typically provide the opportunity to reduce transaction costs. When selling bonds, each year we complete trades with over one hundred dealers so we can put them in competition to produce the best bid rather than relying on just one firm. Similarly, when buying bonds, we have access to the same number of dealers, so we can select from the full range of new issues and bonds offered in the secondary market. Stifel prohibits us from trading directly with them even if they have the best offer or best bid in the marketplace, to avoid the duplication of fees. Lord Abbett does not mark up or charge commission for trades, so we do not collect any profits from completing the transactions. The dealers we trade with include their commission in the net price they are paying. We do not control their markup but are able to monitor them through market data to make sure they are fair. Commissions are typically smaller for larger institutional size trades and when dealers are put in competition for business, but we review the net prices to determine if the bid or offer is attractive for our clients. Commissions charged, if any, come from the client's custodian.

<b>If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details</b>	Trades we conduct for Benjamin F. Edwards program accounts invested in our fixed income strategies are executed as step-outs to avoid conflicts with principal/agency status of sponsor firms and to seek best execution for clients. When we step-out trades for fixed income accounts, trading lists are sent to multiple dealers with the goal of achieving best execution. Dealers are not paid a fee for bond transactions, but instead are compensated by the bid/ask spread. As such, there are no additional costs beyond the bid/ask spread that are charged as a result of step-out fixed income transactions. We seek to buy/sell full positions, but markets occasionally require us to buy/sell partial positions. In such cases, allocation post-trade occurs and we will apply securities/proceeds pro rata across effective accounts. By aggregating the purchases or sales of a broader base of clients, including those who use other brokers and/or custodians, we may be able to find additional bonds available in larger blocks, resulting in better overall prices.

Manager's Style	Total Trades	Total Trades Done Away	Total # of Shares/Units Traded	Total # of Shares/Units Done Away	Total \$ Value of Trades	Total \$ Value of Trades Done Away	Total Trade Away Cost (mark-ups, mark-downs, commissions, etc.)
Municipal Intermediate	16	16	280,000	280,000	\$ 305,457.81	\$ 305,457.81	\$ 0.00
<b>If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details</b>	<p>Pursuant to agreements between NBIA and Program Sponsors for discretionary investment sub-advisory services, NBIA has an obligation to seek best execution. "Best execution" generally imposes an obligation on investment advisers to seek broker-dealers that the investment adviser believes are capable of providing the best qualitative execution of client trade orders under the circumstances, taking into account the full range and quality of the services offered by the broker-dealers, including the broker-dealers' execution capabilities, the costs of the trade, the broker-dealers' financial responsibility, the value of the research provided (if any), and their responsiveness to the manager.</p> <p>In the context of fixed income, NBIA typically trades with broker-dealers other than the Program Sponsors or their designated brokers. Due to the fragmented nature of the over-the-counter market, we believe best execution can be achieved by leveraging the expertise that NBIA has in this area, including, but not limited to, its extensive network of regional broker-dealers. In addition, many Program Sponsors or designated brokers have limited capabilities in the fixed income area or are subject to restrictions on principal transactions that would limit their ability to act as dealer or principal in transactions with Program Clients. In order to seek to ensure the best overall execution for clients, NBIA uses various market sources including third party data providers such as (but not limited to) Bloomberg, MSRB and Municipal Market Analytics, Inc. In addition, trading away from the Program Sponsor or its designated brokers allows NBIA to aggregate orders across clients' accounts, including the accounts of the Program Clients, in an effort to obtain more favorable execution than might otherwise be available if orders were not aggregated. That the use of block trades could also assist in potentially avoiding an adverse effect on the price of a security that could result from simultaneously placing a number of separate, successive or competing client orders.</p> <p>Other considerations for trading away from the Program Sponsors or designated brokers include, but are not limited to, less price dispersion, access to inventory, speed of execution, and the ability to allocate investment and trading opportunities across all program client accounts included in a block trade on a fair and equitable basis.</p> <p>While NBIA does not charge or receive any additional fees or commissions when NBIA chooses to trade away from the Program Sponsor or its designated brokers, the Program Clients will generally incur mark-ups/concessions and other transaction-related charges in addition to the Program Sponsor's or designated broker's bundled fee or brokerage fee paid by each Program Client.</p> <p>Given the nature of fixed income markets, we believe all participants incur similar charges related to fixed income trades that are not disclosed separately from the cost of the security except in limited circumstances. Additionally, it is increasingly common that there may be costs associated with the use of electronic trading platforms, which display bids and offerings from multiple brokers and other participants transacting in the fixed income marketplace. The costs associated with transactions via these electronic platforms typically have the following ranges: for municipal securities - \$.10 to \$10 per bond, with the higher fee rate of \$10 per bond usually reserved for infrequent instances where very small lot sizes are being traded (e.g., fewer than five bonds); for taxable securities - 0.4 basis points to 0.08 basis points. While any cost (i.e., the mark-ups or mark-downs built into fixed income transaction prices due to the over-the-counter nature of the market) incurred by NBIA in trading away are borne by the client and in addition to the client's wrap fee, we believe that, based on the nature of the fixed income markets and a review of various Program Sponsors' Form ADV disclosures, the Program Sponsor would incur similar costs, including ones relating to electronic platforms, if the trades were placed through them (and not traded away by NBIA to other broker-dealers) as these costs are a function of the market, rather than the trading entity, while potentially not having similar benefits of aggregating trades among other NBIA client accounts.</p> <p>For the above reasons, we believe that we can fulfill our best execution obligation while trading away from the Program Sponsor or its designated brokers for fixed income securities transactions. If after considering the above information the Program Sponsor prefers to direct NBIA to trade fixed income securities with the Program Sponsor or its designated broker because it believes it is better positioned to achieve best execution, please so instruct NBIA.</p>

RiverFront Investment Group

Manager's Style	Total Trades	Total Trades Done Away	Total # of Shares/Units Traded	Total # of Shares/Units Done Away	Total \$ Value of Trades	Total \$ Value of Trades Done Away	Total Trade Away Cost (mark-ups, mark-downs, commissions, etc.)
Moderate Growth & Income ETF	38	10	436	326	\$ 54,798.00	\$ 41,454.00	\$ 0.00
<p><b>If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details</b></p>	<p>RiverFront offers asset allocation portfolios for a range of investment objectives and risk tolerances that can be bought through wrap fee programs at dually registered brokerage and investment advisory firms (referred to throughout this document as "Sponsor Firms"). RiverFront has trading discretion over these asset allocation portfolios if they are purchased as separately managed accounts ("SMAs"); RiverFront does not have trading discretion over portfolios purchased in unified managed accounts ("UMAs") and model delivery programs ("MDPs"). The information below pertains only to SMA wrap fee clients that have granted RiverFront trading discretion over their account(s). Presently, "Maintenance Trades," which we define as trading that results from new accounts, liquidations, cash/security addition or withdrawals, tax harvesting, or any other client-requested transactions, are typically processed through the client's Sponsor Firm's managed-money desk. Portfolio management-driven model changes (across-the-board or "ATB" trades) are typically aggregated and submitted via a block trade to a third-party brokerage firm in order to seek best execution (a "Trade Away Transaction"). RiverFront does not currently execute Trade Away Transactions with its Sponsor Firms.</p> <p>We have determined that best execution on our ATB trades is generally achieved through Trade Away Transactions, even though our SMA clients will incur additional brokerage costs related to the Trade Away Transactions (see the table below for additional information on these costs). While the Sponsor Firms' managed money desks have proven very capable, we often have complicated execution strategies that require greater timing flexibility, or in the case of exchange-traded products ("ETPs"), which include both exchange-traded funds and exchange-traded notes that demand direct access to an authorized participant for a single block execution. Based on our trading experience, trading away has many advantages, including, without limitation, that it leads to less price dispersion, limits exposure to information leakage and high frequency traders, and allows us to be more nimble in our trading, thereby avoiding potential delay costs.</p> <p>We have considered executing these ATB transactions via a trade rotation among the Sponsor Firms; however, based on our trading experience and analysis, we currently believe that trading away enables us to achieve best execution for our clients. RiverFront's Brokerage Committee will continue to periodically evaluate our trade execution strategy in order to ensure that we continue to provide best execution for our clients.</p> <p>By trading away our ATB trades, we believe that we can obtain better execution for our clients and eliminate price dispersion across different Sponsor Firms. Furthermore, we have been able to identify other avenues of liquidity away from our Sponsor Firm managed money desks. We can use a variety of algorithms to optimize each unique trading objective. Logical participation strategies, such as volume-weighted average price ("VWAP") and time-weighted average price ("TWAP") can be managed in a single block, which helps to achieve better execution than can be accomplished through a series of small transactions with Sponsor Firms. Finally, for ETP securities that may appear to be illiquid, we can use brokers that are able to source liquidity in an alternative manner to minimize price impact and ensure execution near the ETP's net asset value ("NAV"). We regard the ability to create and redeem the ETP basket as a critical requirement to achieve our best-execution requirements, and thus request that ETP buys and sells are consolidated into a single block execution.</p> <p>For the reasons stated above, RiverFront has determined that best execution should be achieved differently for ATB trades than for Maintenance Trades. RiverFront believes that ATB trades are in most cases better executed through Trade Away Transactions, while Maintenance Trades are usually better executed through the clients' Sponsor Firms. Please note, for many, if not all Trade Away Transactions, there will likely be no disclosed markup/markdown. In these instances, the undisclosed markup or markdown is netted into the price the client receives. Since the executing broker does not provide data to us regarding the dollar amount of the markup or markdown in these instances, we cannot disclose an amount to the client, and will list "0" in this column until such time as we are able to provide additional information, if any. These types of trades include, but are not limited to, transactions in shares of ETPs in which an Authorized Participant or market maker is providing RiverFront with a two-sided market for execution. Once a trade is complete, however, we will send a written request to the executing broker to confirm, in writing, trade information, including markup/markdowns. To the best of our ability, therefore, we will seek to obtain and provide to clients the markup/markdowns disclosed to us from the executing broker, either through trade confirmations or in other written form.</p>

<p><b>If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details</b></p>	<p>RiverFront offers asset allocation portfolios for a range of investment objectives and risk tolerances that can be bought through wrap fee programs at dually registered brokerage and investment advisory firms (referred to throughout this document as "Sponsor Firms"). RiverFront has trading discretion over these asset allocation portfolios if they are purchased as separately managed accounts ("SMAs"); RiverFront does not have trading discretion over portfolios purchased in unified managed accounts ("UMAs") and model delivery programs ("MDPs"). The information below pertains only to SMA wrap fee clients that have granted RiverFront trading discretion over their account(s). Presently, "Maintenance Trades," which we define as trading that results from new accounts, liquidations, cash/security addition or withdrawals, tax harvesting, or any other client-requested transactions, are typically processed through the client's Sponsor Firm's managed-money desk. Portfolio management-driven model changes (across-the-board or "ATB" trades) are typically aggregated and submitted via a block trade to a third-party brokerage firm in order to seek best execution (a "Trade Away Transaction"). RiverFront does not currently execute Trade Away Transactions with its Sponsor Firms.</p> <p>We have determined that best execution on our ATB trades is generally achieved through Trade Away Transactions, even though our SMA clients will incur additional brokerage costs related to the Trade Away Transactions (see the table below for additional information on these costs). While the Sponsor Firms' managed money desks have proven very capable, we often have complicated execution strategies that require greater timing flexibility, or in the case of exchange-traded products ("ETPs"), which include both exchange-traded funds and exchange-traded notes that demand direct access to an authorized participant for a single block execution. Based on our trading experience, trading away has many advantages, including, without limitation, that it leads to less price dispersion, limits exposure to information leakage and high frequency traders, and allows us to be more nimble in our trading, thereby avoiding potential delay costs.</p> <p>We have considered executing these ATB transactions via a trade rotation among the Sponsor Firms; however, based on our trading experience and analysis, we currently believe that trading away enables us to achieve best execution for our clients. RiverFront's Brokerage Committee will continue to periodically evaluate our trade execution strategy in order to ensure that we continue to provide best execution for our clients.</p> <p>By trading away our ATB trades, we believe that we can obtain better execution for our clients and eliminate price dispersion across different Sponsor Firms. Furthermore, we have been able to identify other avenues of liquidity away from our Sponsor Firm managed money desks. We can use a variety of algorithms to optimize each unique trading objective. Logical participation strategies, such as volume-weighted average price ("VWAP") and time-weighted average price ("TWAP") can be managed in a single block, which helps to achieve better execution than can be accomplished through a series of small transactions with Sponsor Firms. Finally, for ETP securities that may appear to be illiquid, we can use brokers that are able to source liquidity in an alternative manner to minimize price impact and ensure execution near the ETP's net asset value ("NAV"). We regard the ability to create and redeem the ETP basket as a critical requirement to achieve our best-execution requirements, and thus request that ETP buys and sells are consolidated into a single block execution.</p> <p>For the reasons stated above, RiverFront has determined that best execution should be achieved differently for ATB trades than for Maintenance Trades. RiverFront believes that ATB trades are in most cases better executed through Trade Away Transactions, while Maintenance Trades are usually better executed through the clients' Sponsor Firms. Please note, for many, if not all Trade Away Transactions, there will likely be no disclosed markup/markdown. In these instances, the undisclosed markup or markdown is netted into the price the client receives. Since the executing broker does not provide data to us regarding the dollar amount of the markup or markdown in these instances, we cannot disclose an amount to the client, and will list "0" in this column until such time as we are able to provide additional information, if any. These types of trades include, but are not limited to, transactions in shares of ETPs in which an Authorized Participant or market maker is providing RiverFront with a two-sided market for execution. Once a trade is complete, however, we will send a written request to the executing broker to confirm, in writing, trade information, including markup/markdowns. To the best of our ability, therefore, we will seek to obtain and provide to clients the markup/markdowns disclosed to us from the executing broker, either through trade confirmations or in other written form.</p>

Manager's Style	Total Trades	Total Trades Done Away	Total # of Shares/Units Traded	Total # of Shares/Units Done Away	Total \$ Value of Trades	Total \$ Value of Trades Done Away	Total Trade Away Cost (mark-ups, mark-downs, commissions, etc.)
Tandem Large Cap Core	6,024	1,716	72,527	35,053	\$ 28,178,213.19	\$ 3,116,427.73	\$ 350.53
<b>If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details</b>	<p>In selecting broker/dealers to execute our trades in client portfolios, we will seek to obtain the best execution for our clients, taking into account a number of factors: whether the broker/dealer has custody of client assets; the ability to effect prompt and reliable executions at favorable prices (including the applicable commission, if any); the operational efficiency with which transactions are effected, taking into account the size of the order and difficulty of execution; and the competitiveness of commission rates in comparison with other broker/dealers satisfying our other selection criteria.</p> <p>Trades for the same security executed on behalf of more than one client are typically aggregated (called "bunching" or "block trading") and executed through the same broker/dealer, if aggregating serves the best interests of all participating clients and is permitted by the client's custodian. All block trades executed through the same broker/dealer will receive the same price, which will be averaged across all trades in the given block with that broker/dealer.</p> <p>If a block trade is executed among different trading platforms, we use a trade rotation log. The rotation order changes daily. The platform with the first spot in the rotation will move to the end of the rotation the following day. Each platform moves up one spot in the rotation each day.</p> <p>If you participate in a wrap program account, commissions are included in the fees charged by the broker/dealer sponsoring the wrap program. However, to seek best execution for our clients, we may place your trades through broker/dealers other than those sponsoring the wrap programs in which you participate. Such trades are known as "step-outs" and unless you prohibit step-outs in written instruction to us, we will utilize step-outs when placing trades across multiple custodians to ensure our clients are not competing with one another for best execution. The broker/dealer executing a step-out trade will receive a commission paid for by each client. A client participating in a wrap program will incur this cost in addition to any cost or fee imposed by the client's custodian broker/dealer. We believe that step-outs provide execution value beyond the incremental cost. Not all broker/dealers sponsoring wrap programs permit step-outs. Based on the total number of Firm trades in 2025, 35.68% were "step-out" trades.</p> <p>For all accounts custodied in a manner that allows Tandem to "step-out" or "trade away" from the custodian, the Tandem trader is able to use discretion over the broker executing the trades.</p> <p>We trade with highly qualified brokers who charge competitive commission rates. The overall reasonableness of brokerage commission paid is determined based upon the quality of execution of the services performed and of the research or trading services provided. In appropriate circumstances, we pay brokerage commission in excess of that which another broker may have charged for effecting the same transaction in recognition of the quality and reliability of execution of brokerage services and the trading services provided.</p> <p>We do not recommend broker/dealers to clients in exchange for referrals, nor do we suggest that clients use directed brokerage relationships. For clients that hire us directly without a relationship with a financial advisor, we may suggest a custodian, but we do not require you to follow this suggestion.</p> <p>Tandem does not have any soft dollar arrangements and does not participate in principal or agency cross transactions.</p>
