INVESTMENTS *for* GENERATIONS[®]

Trade Away Disclosure for Period of July 1, 2024 – September 30, 2024

The information in this document is supplemental to the material provided in the advisory program disclosure brochures for *Benjamin F. Edwards & Co* and *Benjamin F. Edwards Wealth Management* (collectively “BFE”), which are [available on our website](#). This information is intended for clients who participate, or are considering participating, in BFE’s advisory programs which involve the use of third-party asset managers (Managers). It is intended to provide a general idea of the frequency, if any, of “step out” trades performed by the Managers BFE sponsors, as well as a summary of costs associated with the step out trades.

Step out trading occurs when Managers execute trades away from BFE’s primary custodians and/or clearing firms. Managers may choose to do this for a variety of reasons including to fulfil their obligation to seek the best execution for their clients’ orders, or to access better liquidity. This document is designed to provide insight into each Manager’s practices so that clients may make informed decisions as to whether to participate in the managed programs Benjamin F. Edwards sponsors.

All of the data provided herein was supplied directly by the respective Manager. The level of detail provided by Managers varies and BFE has not independently verified this information. BFE makes regular inquiries with the Managers it sponsors and will update this information from time to time. If a Manager does not respond to BFE’s inquiries, that Manager’s information will not be included in this document.

For more information, please see our advisory [program disclosure brochures](#) or contact your Benjamin F. Edwards financial advisor.

Astor Investment Management, LLC

Manager's Style	Total # of Trades	Total # of Trades Done Away	Total # of Shares/Units Traded	Total # of Shares/Units Done Away	Total \$ Value of Trades	Total \$ Value of Trades Done Away	Total of all added fees/costs associated with trades done away (mark-ups, mark downs, commissions, etc.)
Astor Dynamic Allocation	717	428	141,286	103,469	\$6,214,617.00	\$4,207,510.00	\$517.00
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	Typically, we trade away when we adjust our portfolios and rebalance across all subscribed accounts. We do this in order to aggregate trades across multiple platforms and achieve better access to liquidity providers. In the past quarter, due to the low volume of trades in this strategy (and diminishing SMA accounts), we felt it more beneficial in some instances to trade directly with the custodian and thus avoid the additional step-out costs. On these occasions, a trade rotation was put into place. There were still some trades that were executed away in names where we were either already stepping out in another strategy or felt the names traded were better suited to be executed by an executing broker.						

Belle Haven Investments, L.P.

3-17 Year Ladder	23	23					\$0.00
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	We will trade away 100% of the time as we utilize our own broker/dealer to execute trades, which has allowed us to provide best execution as we do not charge mark-ups, markdowns or commissions. Belle Haven is a fully registered Broker/Dealer as well as a Registered Investment Advisor. Our Broker/Dealer is utilized to service our RIA by allowing us access to the wholesale market. While traditional money managers must source their bonds through several Broker/Dealers via institutional coverage, each charging a mark-up (or mark-down), we are able to eliminate the need for such an inefficient process and directly source our bonds on the bid side of the market. We are effectively removing a middleman from the transaction. By exploiting this inherent inefficiency in the fixed income space, we are able to generate alpha without having to rely solely upon elevated credit or interest rate risk for increased alpha generation.

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	Crossmark utilizes step-out transactions when appropriate, if allowed by the custodian, to achieve better execution in the marketplace. Trading away allows us to trade with a broad network of dealers, helping us to improve execution quality.						

Dana Investment Advisors

Manager's Style	Total # of Trades	Total # of Trades Done Away	Total # of Shares/Units Traded	Total # of Shares/Units Done Away	Total \$ Value of Trades	Total \$ Value of Trades Done Away	Total of all added fees/costs associated with trades done away (mark-ups, mark downs, commissions, etc.)
Dana Social ESG Bond	44	8	1,361,979	132,000	\$501,566.00	\$138,648.00	\$0.00
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	When looking to execute fixed income security trades for client accounts, Dana portfolio managers review a multitude of factors in determining which broker dealer to place fixed income transactions through. While execution costs are an important consideration in any transactions, most transaction decisions are based upon a combination of price / yield as well as other relevant security attributes that are largely based on the idiosyncratic characteristics of the specific securities. Whether executing the purchase or sale of a fixed income security, Dana will attempt to contact multiple institutional fixed income brokers/dealers to begin "negotiating" the purchase or sale of the security. Many fixed income securities transacted in by Dana are unique in nature and are often not offered for sale (or purchase) directly by Sponsored Programs, so therefore Dana relies more heavily on the combination of price / yield comparisons between competing institutional broker/dealer firms. No additional fees or costs are incurred when trading away.

Small Cap Quality Value	30	28	4,374	4,363	\$19,301.00	\$18,963.00	\$57.00
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	Trading away (i.e., step outs) has many advantages, including, without limitation, less price dispersion across all of our client accounts by allowing us to bunch executions, limiting exposure to information leakage and high frequency traders, and allowing us to be more nimble in our trading, thereby avoiding potential delay costs. Managing a single block improves our ability to achieve better execution than can be accomplished through a series of small transactions with multiple sponsor firms. Therefore, we view step out trading as a critical process for seeking best execution.

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	<p>What was the benefit sought for trading away: Lazard Asset Management LLC seeks to execute transactions for Clients in such a manner that the Client's total cost or proceeds in each transaction is the most favorable under the circumstances in accordance with its duties pursuant to SEC guidance regarding best execution.</p> <p>What was the benefit realized for trading away: Lazard Asset Management LLC seeks to execute transactions for Clients in such a manner that the Client's total cost or proceeds in each transaction is the most favorable under the circumstances in accordance with its duties pursuant to SEC guidance regarding best execution.</p> <p>Provide a written assessment indicating if best execution was achieved (or not), with such conclusion explicitly in terms of the benefits sought/realized given the costs that were incurred: On a quarterly basis, the firm sends all wrap trading data to Virtu Financial (f/k/a) Investment Technology Group, Inc., ("Virtu") for forensic review of the cost associated with wrap trading and step-outs. This review is designed to test whether the firm's trading of model portfolios adhere to best execution with reference to a combination of metrics: (a) basis points deviation from the benchmark (2-day VWAP) and (b) dollar amount impact fields. We review Virtu's output for trade outliers that are represented in the bottom 2% with reference to the benchmark and incur a trading loss of over \$2500. The results of our review indicate that the cost Lazard achieves is more favorable than our wrap program sponsors. Thus far, none of our step-out trades have been identified as an outlier. The results of our review suggest that Lazard's current trading of model portfolios is adequately designed to achieve best execution.</p>

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	<p>Trades away do not incur any additional costs and typically provide the opportunity to reduce transaction costs. For selling bonds, each year we complete trades with over one hundred dealers so we can put them in competition to produce the best bid rather than relying on just one firm to provide liquidity. Similarly when we buy bonds we have access to the same number of dealers so we are able to select from the full range of new issues and bonds offered in the secondary market. Lord Abnett does not mark up or charge commission for trades, so we do not collect any profits from completing the transactions. The dealers we trade with include the size of their commission in the net price they are paying us so we do not control their markup but are able to monitor them through market data in order to make sure they are fair. Commissions are typically smaller for larger institutional size trades and when dealers are put in competition for business, but we review the net prices to us to determine if the bid or offer is attractive for our clients. Any commissions that are charged generally come from the client's custodian, if they are charged at all.</p>

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	Trades we conduct for Benjamin F. Edwards program accounts invested in our fixed income strategies are executed as step-outs to avoid conflicts with principal/agency status of sponsor firms and to seek best execution for clients. When we step-out trades for fixed income accounts, trading lists are sent to multiple dealers with the goal of achieving best execution. Dealers are not paid a fee for bond transactions, but instead are compensated by the bid/ask spread. As such, there are no additional costs beyond the bid/ask spread that are charged as a result of step-out fixed income transactions. We seek to buy/sell full positions, but markets occasionally require us to buy/sell partial positions. In such cases, allocation post-trade occurs and we will apply securities/proceeds pro rata across effective accounts. By aggregating the purchases or sales of a broader base of clients, including those who use other brokers and/or custodians, we may be able to find additional bonds available in larger blocks, resulting in better overall prices.

Municipal Intermediate	13	13		565,000	\$629,839.00	\$629,839.00	
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	<p>Pursuant to agreements between NBIA and Program Sponsors for discretionary investment sub-advisory services, NBIA has an obligation to seek best execution. "Best execution" generally imposes an obligation on investment advisers to place client trade orders with the broker-dealers that the investment adviser believes are capable of providing the best qualitative execution of client trade orders under the circumstances, taking into account the full range and quality of the services offered by the broker-dealers, including the broker-dealers' execution capabilities, the costs of the trade, the broker-dealers' financial responsibility, the value of the research provided (if any), and their responsiveness to the manager.</p> <p>In the context of fixed income, and more specifically, municipal securities, NBIA typically trades with broker-dealers other than the Program Sponsors or their designated brokers. Due to the fragmented nature of the over-the-counter municipal market, we believe best execution can be achieved by leveraging the expertise that NBIA has in this area, including, but not limited to, its extensive network of regional broker-dealers. In order to seek to ensure the best overall execution for clients, NBIA uses various market sources including third party data providers such as (but not limited to) Bloomberg, MSRB and Municipal Market Analytics, Inc. In addition, trading away from the Program Sponsor or its designated brokers allows NBIA to aggregate orders across clients' accounts, including the accounts of the Program Clients, in an effort to obtain more favorable execution, including better pricing and enhanced investment opportunities, than would otherwise be available if orders were not aggregated. We believe that using block trades may also assist in potentially avoiding an adverse effect on the price of a security that could result from simultaneously placing a number of separate, successive or competing client orders.</p> <p>While NBIA does not charge any additional fees or commissions when NBIA chooses to trade away from the Program Sponsor or its designated brokers, the Program Clients will generally incur mark-ups/concessions and other transaction-related charges in addition to the Program Sponsor's or designated broker's bundled fee or brokerage fee paid by each Program Client. Given the nature of fixed income markets, we believe all participants incur similar charges related to fixed income trades that are not disclosed separately from the cost of the security. Additionally, it is increasingly common in the municipal securities market that there may be costs associated with the use of electronic trading platforms, which display bids and offerings from multiple brokers and other participants transacting in the municipal marketplace. The costs associated with transactions via these electronic platforms typically range from \$.10 to \$10 per bond, with the higher fee rate of \$10 per bond usually reserved for infrequent instances where very small lot sizes are being traded (e.g., fewer than five bonds). While any cost (i.e., the mark-ups or mark-downs built into fixed income transaction prices due to the over-the-counter nature of the market) incurred by NBIA in trading away in muni security transactions are indirectly borne by the client and incremental to the client's wrap fee, we believe that, based on the nature of the fixed income markets and a review of various Program Sponsors' Form ADV disclosures, the Program Sponsor would incur the same or similar costs, including ones relating to electronic platforms, in the muni market if the trades were placed through them and not stepped out by NBIA as these costs are a function of the market, rather than the trading entity, while potentially not having the same or similar benefit of aggregating trades among other NBIA client accounts to seek a lower overall execution cost.</p> <p>For the above reasons, we believe that we can fulfill our best execution obligation while trading away from the Program Sponsor or its designated brokers for municipal securities transactions. If after considering the above information the Program Sponsor prefers to direct NBIA to trade municipal securities with the Program Sponsor or its designated broker because it believes it is better positioned to achieve best execution, please so instruct NBIA.</p>						

New York Life Investments - Mackay Shields LLC

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	<p>The MacKay Shields convertible strategy employs the use of trade-aways for the majority of the trading done for all clients across all sponsor platforms. This is not limited to a particular quarter or a period of time, but has been and will be consistent as part of our trading strategy. The portfolio composition of convertible bonds varies between 80% and 90% of the model portfolio with the remainder being convertible preferred stock. We trade all the listed preferred that have sufficient liquidity with the sponsor platforms but trade the bonds exclusively with market makers with whom MacKay Shields has an established relationship with the convertible trading desks and who make markets for our securities. This is a specialized product and we aggregate the securities across accounts as well as sponsor firms to build larger blocks and get better pricing for all of our clients. Because many of the convertible bonds are difficult to execute, we employ this strategy to achieve best execution. As these transactions are mainly bonds or over the counter preferred stock there were no additional mark ups or commissions on these transactions beyond the structure of the customary bid / offer prices and we believe that these transactions were executed on behalf of our clients in such a manner that the clients' total cost or proceeds in each transaction was the most favorable under the circumstances. It should be noted that in seeking to maintain best execution on behalf of our clients, we may consider factors beyond simply price, commission rates or spreads, including the full range and quality of a broker's services in placing brokerage. These factors might include, among other things, the value of research provided, execution capability, financial responsibility, and responsiveness. The convertible portfolio does not generate soft dollar commissions.</p>						

Nuveen Asset Management, LLC

Manager's Style	Total # of Trades	Total # of Trades Done Away	Total # of Shares/Units Traded	Total # of Shares/Units Done Away	Total \$ Value of Trades	Total \$ Value of Trades Done Away	Total of all added fees/costs associated with trades done away (mark-ups, mark downs, commissions, etc.)
Nuveen Intermediate Term Municipal Bond	115	115	4,045,000	4,045,000	\$4,285,222.00	\$4,285,222.00	
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	<p>Where Nuveen Asset Management trades away, clients generally incur implicit transaction costs and fees in addition to the wrap fee. These fees are generally in the form of mark-ups and mark-downs, or spreads, earned by the relevant securities dealer (not Nuveen Asset Management or a Nuveen affiliate) in addition to the wrap fee payable to the wrap program sponsor.</p> <p>For secondary market trades, dealer trading mark-ups typically range from 1 to 10 basis points (a few cents to several dollars) per bond depending on several factors, including position size, market strength or weakness and holding period among others. For primary market (new issue) trades, there are no additional trading costs.</p> <p>When Nuveen Asset Management believes that the broker-dealer serving as managed account program sponsor or custodian or a broker-dealer that is otherwise designated by a client cannot provide best execution, Nuveen seeks to trade away from such broker-dealer to the extent necessary and if permitted under the relevant agreement. Nuveen defines best execution as a responsibility to our clients to seek the best price when trading municipal securities under prevailing market circumstances.</p> <p>Nuveen Asset Management has established a Municipal Separately Managed Accounts ("SMA") Best Execution Committee, which is responsible for reviewing, evaluating and reporting its conclusions regarding the quality of Nuveen Asset Management's municipal trading activities with respect to SMA accounts to ensure that such client accounts receive execution quality consistent with standards established by Nuveen Asset Management. The Municipal SMA Best Execution Committee meets periodically and its responsibilities include, but are not limited to, the review of internally prepared reports analyzing execution of securities and making any necessary recommendations to address deviations from the execution standards set forth, including communicating with sponsors to address.</p> <p>The firm believes it has met its best execution obligations with the best execution procedures currently in place. As part of our best execution process, we review internally generated trade reports and assess trade price, block size, security level characteristics (credit quality, calls, sector, etc.) and prevailing market conditions, among other factors. We also review other trades that are executed for the same bond. Trade execution is reviewed by the head of our SMA portfolio management team. On a semi-annual basis, our compliance team will prepare and review internal reports analyzing the trade execution for Discretionary SMAs and will report such information to the relevant NAM Best Execution Committee for further review.</p>

Nuveen Limited-Maturity Municipal Bond	48	48	860,000	860,000	\$930,113.00	\$930,113.00	
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	<p>Where Nuveen Asset Management trades away, clients generally incur implicit transaction costs and fees in addition to the wrap fee. These fees are generally in the form of mark-ups and mark-downs, or spreads, earned by the relevant securities dealer (not Nuveen Asset Management or a Nuveen affiliate) in addition to the wrap fee payable to the wrap program sponsor. For secondary market trades, dealer trading mark-ups typically range from 1 to 10 basis points (a few cents to several dollars) per bond depending on several factors, including position size, market strength or weakness and holding period among others. For primary market (new issue) trades, there are no additional trading costs.</p> <p>When Nuveen Asset Management believes that the broker-dealer serving as managed account program sponsor or custodian or a broker-dealer that is otherwise designated by a client cannot provide best execution, Nuveen seeks to trade away from such broker-dealer to the extent necessary and if permitted under the relevant agreement. Nuveen defines best execution as a responsibility to our clients to seek the best price when trading municipal securities under prevailing market circumstances.</p> <p>Nuveen Asset Management has established a Municipal Separately Managed Accounts ("SMA") Best Execution Committee, which is responsible for reviewing, evaluating and reporting its conclusions regarding the quality of Nuveen Asset Management's municipal trading activities with respect to SMA accounts to ensure that such client accounts receive execution quality consistent with standards established by Nuveen Asset Management. The Municipal SMA Best Execution Committee meets periodically and its responsibilities include, but are not limited to, the review of internally prepared reports analyzing execution of securities and making any necessary recommendations to address deviations from the execution standards set forth, including communicating with sponsors to address.</p> <p>The firm believes it has met its best execution obligations with the best execution procedures currently in place. As part of our best execution process, we review internally generated trade reports and assess trade price, block size, security level characteristics (credit quality, calls, sector, etc.) and prevailing market conditions, among other factors. We also review other trades that are executed for the same bond. Trade execution is reviewed by the head of our SMA portfolio management team. On a semi-annual basis, our compliance team will prepare and review internal reports analyzing the trade execution for Discretionary SMAs and will report such information to the relevant NAM Best Execution Committee for further review.</p>

TABS Ladder	29	29	390,000	390,000	\$418,273.00	\$418,273.00	\$0.00
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	TABS engages in broker-to-broker step-out transactions in the ordinary course in the SMA (separately managed account) business. The step-out trade model is the accepted industry standard as it allows advisors to book block trades that include allocations to many accounts within the strategy. The executing broker then only has to match our custodian and/or broker's submission on the MSRB's Real Time Trade Management (RTTM) system rather than having to create an individual trade for each individual account. Each account receives the same price. This helps to reduce costs, make that trading process more efficient and reduce the likelihood of errors. There is no additional cost to clients for using this methodology for trading.

Dynamic Equity Income	5,343	917	523,237	92,210	\$23,750,409.00	\$5,166,491.00	\$0.00
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	<p>RiverFront offers asset allocation portfolios for a range of investment objectives and risk tolerances that can be bought through wrap fee programs at dually registered brokerage and investment advisory firms (referred to throughout this document as "Sponsor Firms"). RiverFront has trading discretion over these asset allocation portfolios if they are purchased as separately managed accounts ("SMAs"); RiverFront does not have trading discretion over portfolios purchased in unified managed accounts ("UMAs") and model delivery programs ("MDPs"). The information below pertains only to SMA wrap fee clients that have granted RiverFront trading discretion over their account(s).</p> <p>Presently, "Maintenance Trades," which we define as trading that results from new accounts, liquidations, cash/security addition or withdrawals, tax harvesting, or any other client-requested transactions, are typically processed through the client's Sponsor Firm's managed-money desk. Portfolio management-driven model changes (across-the-board or "ATB" trades) are typically aggregated and submitted via a block trade to a third-party brokerage firm in order to seek best execution (a "Trade Away Transaction"). RiverFront does not currently execute Trade Away Transactions with its Sponsor Firms.</p> <p>We have determined that best execution on our ATB trades is generally achieved through Trade Away Transactions, even though our SMA clients will incur additional brokerage costs related to the Trade Away Transactions (see the table below for additional information on these costs). While the Sponsor Firms' managed money desks have proven very capable, we often have complicated execution strategies that require greater timing flexibility, or in the case of exchange-traded products ("ETPs"), which include both exchange-traded funds and exchange-traded notes that demand direct access to an authorized participant for a single block execution. Based on our trading experience, trading away has many advantages, including, without limitation, that it leads to less price dispersion, limits exposure to information leakage and high frequency traders, and allows us to be more nimble in our trading, thereby avoiding potential delay costs.</p> <p>We have considered executing these ATB transactions via a trade rotation among the Sponsor Firms; however, based on our trading experience and analysis, we currently believe that trading away enables us to achieve best execution for our clients. RiverFront's Brokerage Committee will continue to periodically evaluate our trade execution strategy in order to ensure that we continue to provide best execution for our clients.</p> <p>By trading away our ATB trades, we believe that we can obtain better execution for our clients and eliminate price dispersion across different Sponsor Firms. Furthermore, we have been able to identify other avenues of liquidity away from our Sponsor Firm managed money desks. We can use a variety of algorithms to optimize each unique trading objective. Logical participation strategies, such as volume-weighted average price ("VWAP") and time-weighted average price ("TWAP") can be managed in a single block, which helps to achieve better execution than can be accomplished through a series of small transactions with Sponsor Firms. Finally, for ETP securities that may appear to be illiquid, we can use brokers that are able to source liquidity in an alternative manner to minimize price impact and ensure execution near the ETP's net asset value ("NAV"). We regard the ability to create and redeem the ETP basket as a critical requirement to achieve our best-execution requirements, and thus request that ETP buys and sells are consolidated into a single block execution.</p> <p>For the reasons stated above, RiverFront has determined that best execution should be achieved differently for ATB trades than for Maintenance Trades. RiverFront believes that ATB trades are in most cases better executed through Trade Away Transactions, while Maintenance Trades are usually better executed through the clients' Sponsor Firms.</p> <p>Please note, for many, if not all Trade Away Transactions, there will likely be no disclosed markup/markdown. In these instances, the undisclosed markup or markdown is netted into the price the client receives. Since the executing broker does not provide data to us regarding the dollar amount of the markup or markdown in these instances, we cannot disclose an amount to the client, and will list "0" in this column until such time as we are able to provide additional information, if any. These types of trades include, but are not limited to, transactions in shares of ETPs in which an Authorized Participant or market maker is providing RiverFront with a two-sided market for execution.</p> <p>Once a trade is complete, however, we will send a written request to the executing broker to confirm, in writing, trade information, including markup/markdowns. To the best of our ability, therefore, we will seek to obtain and provide to clients the markup/markdowns disclosed to us from the executing broker, either through trade confirmations or in other written form.</p>

The information below pertains only to SMA wrap fee clients that have granted RiverFront trading discretion over their account(s).</p> <p>Presently, "Maintenance Trades," which we define as trading that results from new accounts, liquidations, cash/security addition or withdrawals, tax harvesting, or any other client-requested transactions, are typically processed through the client's Sponsor Firm's managed-money desk. Portfolio management-driven model changes (across-the-board or "ATB" trades) are typically aggregated and submitted via a block trade to a third-party brokerage firm in order to seek best execution (a "Trade Away Transaction"). RiverFront does not currently execute Trade Away Transactions with its Sponsor Firms.</p> <p>We have determined that best execution on our ATB trades is generally achieved through Trade Away Transactions, even though our SMA clients will incur additional brokerage costs related to the Trade Away Transactions (see the table below for additional information on these costs). While the Sponsor Firms' managed money desks have proven very capable, we often have complicated execution strategies that require greater timing flexibility, or in the case of exchange-traded products ("ETPs"), which include both exchange-traded funds and exchange-traded notes that demand direct access to an authorized participant for a single block execution. Based on our trading experience, trading away has many advantages, including, without limitation, that it leads to less price dispersion, limits exposure to information leakage and high frequency traders, and allows us to be more nimble in our trading, thereby avoiding potential delay costs.</p> <p>We have considered executing these ATB transactions via a trade rotation among the Sponsor Firms; however, based on our trading experience and analysis, we currently believe that trading away enables us to achieve best execution for our clients. RiverFront's Brokerage Committee will continue to periodically evaluate our trade execution strategy in order to ensure that we continue to provide best execution for our clients.</p> <p>By trading away our ATB trades, we believe that we can obtain better execution for our clients and eliminate price dispersion across different Sponsor Firms. Furthermore, we have been able to identify other avenues of liquidity away from our Sponsor Firm managed money desks. We can use a variety of algorithms to optimize each unique trading objective. Logical participation strategies, such as volume-weighted average price ("VWAP") and time-weighted average price ("TWAP") can be managed in a single block, which helps to achieve better execution than can be accomplished through a series of small transactions with Sponsor Firms. Finally, for ETP securities that may appear to be illiquid, we can use brokers that are able to source liquidity in an alternative manner to minimize price impact and ensure execution near the ETP's net asset value ("NAV"). We regard the ability to create and redeem the ETP basket as a critical requirement to achieve our best-execution requirements, and thus request that ETP buys and sells are consolidated into a single block execution.</p> <p>For the reasons stated above, RiverFront has determined that best execution should be achieved differently for ATB trades than for Maintenance Trades. RiverFront believes that ATB trades are in most cases better executed through Trade Away Transactions, while Maintenance Trades are usually better executed through the clients' Sponsor Firms.</p> <p>Please note, for many, if not all Trade Away Transactions, there will likely be no disclosed markup/markdown. In these instances, the undisclosed markup or markdown is netted into the price the client receives. Since the executing broker does not provide data to us regarding the dollar amount of the markup or markdown in these instances, we cannot disclose an amount to the client, and will list "0" in this column until such time as we are able to provide additional information, if any. These types of trades include, but are not limited to, transactions in shares of ETPs in which an Authorized Participant or market maker is providing RiverFront with a two-sided market for execution.</p> <p>Once a trade is complete, however, we will send a written request to the executing broker to confirm, in writing, trade information, including markup/markdowns. To the best of our ability, therefore, we will seek to obtain and provide to clients the markup/markdowns disclosed to us from the executing broker, either through trade confirmations or in other written form.</p>						

Firms That Indicated No Trade Aways Were Performed

Manager	Strategy
12th Street Asset Management	Opportunity Managed Account
ACR Alpine Capital Research LLC	Equity Quality Return
AllianceBernstein L.P.	Tax Aware SMA
