

BENJAMIN F. EDWARDS[®]
INVESTMENTS *for* GENERATIONS[®]

Trade Away Disclosure for Period of July 1, 2025 – September 30, 2025

The information in this document is supplemental to the material provided in the advisory program disclosure brochures for *Benjamin F. Edwards & Co* and *Benjamin F. Edwards Wealth Management* (collectively “BFE”), which are [available on our website](#). This information is intended for clients who participate, or are considering participating, in BFE’s advisory programs which involve the use of third-party asset managers (Managers). It is intended to provide a general idea of the frequency, if any, of “step out” trades performed by the Managers BFE sponsors, as well as a summary of costs associated with the step out trades.

Step out trading occurs when Managers execute trades away from BFE’s primary custodians and/or clearing firms. Managers may choose to do this for a variety of reasons including to fulfil their obligation to seek the best execution for their clients’ orders, or to access better liquidity. This document is designed to provide insight into each Manager’s practices so that clients may make informed decisions as to whether to participate in the managed programs Benjamin F. Edwards sponsors.

All of the data provided herein was supplied directly by the respective Manager. The level of detail provided by Managers varies and BFE has not independently verified this information. BFE makes regular inquiries with the Managers it sponsors and will update this information from time to time. If a Manager does not respond to BFE’s inquiries, that Manager’s information will not be included in this document.

For more information, please see our advisory [program disclosure brochures](#) or contact your Benjamin F. Edwards financial advisor.

Beacon Capital Management

Beacon Outlook Dynamic Allocation Model (Astor Dynamic Allocation)	888	138	152,100	48,090	\$1,251,453.00	\$6,113,033.00	\$ 240.45
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	A single security was traded away as part of a model allocation change. The security is a commodity related ETF with a fairly liquid market, but less so than a broad based equity ETF. Blocking the orders across custodians and centralizing to a single liquidity provider allows for a more controlled trade and reduces market impact.

3-17 Year Ladder	1	1					\$ 0.00
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	We execute trades exclusively through our broker-dealer, ensuring 100% of transactions are handled directly, which allows us to offer best execution without the imposition of mark-ups, markdowns, or commissions. Belle Haven operates as both a fully registered broker-dealer and a registered investment advisor. By leveraging our own broker-dealer, we gain direct access to the wholesale market, which enables us to bypass the inefficiencies of sourcing bonds through multiple intermediaries that typically charge mark-ups or markdowns. This streamlined approach eliminates the middleman, enhancing efficiency and improving cost-effectiveness. As a result, we can generate alpha more effectively, without relying solely on elevated credit or interest rate risk, capitalizing on the inherent inefficiencies of the fixed income space.

Dana Social ESG Bond	15	15	425,000	425,000	\$423,857.69	\$423,857.69	\$ 0.00
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	When looking to execute fixed income security trades for client accounts, Dana portfolio managers review a multitude of factors in determining which broker dealer to place fixed income transactions through. While execution costs are an important consideration in any transactions, most transaction decisions are based upon a combination of price / yield as well as other relevant security attributes that are largely based on the idiosyncratic characteristics of the specific securities. Whether executing the purchase or sale of a fixed income security, Dana will attempt to contact multiple institutional fixed income brokers/dealers to begin "negotiating" the purchase or sale of the security. Many fixed income securities transacted in by Dana are unique in nature and are often not offered for sale (or purchase) directly by Sponsored Programs, so therefore Dana relies more heavily on the combination of price / yield comparisons between competing institutional broker/dealer firms. No additional fees or costs are incurred when trading away.

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	Trading away (i.e., step outs) has many advantages, including, without limitation, less price dispersion across all of our client accounts by allowing us to bunch executions, limiting exposure to information leakage and high frequency traders, and allowing us to be more nimble in our trading, thereby avoiding potential delay costs. Managing a single block improves our ability to achieve better execution than can be accomplished through a series of small transactions with multiple sponsor firms. Therefore, we view step out trading as a critical process for seeking best execution.

US Fixed Income Long-Term Municipal Bonds	36	36	885,000	885,000	\$911,383.00	\$911,383.00	\$ 0.00
If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	<p>Trades away do not incur any additional costs and typically provide the opportunity to reduce transaction costs. When selling bonds, each year we complete trades with over one hundred dealers so we can put them in competition to produce the best bid rather than relying on just one firm. Similarly, when buying bonds, we have access to the same number of dealers, so we can select from the full range of new issues and bonds offered in the secondary market. Stifel prohibits us from trading directly with them even if they have the best offer or best bid in the marketplace, to avoid the duplication of fees. Lord Abnett does not mark up or charge commission for trades, so we do not collect any profits from completing the transactions. The dealers we trade with include their commission in the net price they are paying. We do not control their markup but are able to monitor them through market data to make sure they are fair. Commissions are typically smaller for larger institutional size trades and when dealers are put in competition for business, but we review the net prices to determine if the bid or offer is attractive for our clients. Commissions charged, if any, come from the client's custodian.</p>

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details	<p>Trades we conduct for Benjamin F. Edwards program accounts invested in our fixed income strategies are executed as step-outs to avoid conflicts with principal/agency status of sponsor firms and to seek best execution for clients. When we step-out trades for fixed income accounts, trading lists are sent to multiple dealers with the goal of achieving best execution. Dealers are not paid a fee for bond transactions, but instead are compensated by the bid/ask spread. As such, there are no additional costs beyond the bid/ask spread that are charged as a result of step-out fixed income transactions. We seek to buy/sell full positions, but markets occasionally require us to buy/sell partial positions. In such cases, allocation post-trade occurs and we will apply securities/proceeds pro rata across effective accounts. By aggregating the purchases or sales of a broader base of clients, including those who use other brokers and/or custodians, we may be able to find additional bonds available in larger blocks, resulting in better overall prices.</p>

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details

Pursuant to agreements between NBIA and Program Sponsors for discretionary investment sub-advisory services, NBIA has an obligation to seek best execution. "Best execution" generally imposes an obligation on investment advisers to place client trade orders with the broker-dealers that the investment adviser believes are capable of providing the best qualitative execution of client trade orders under the circumstances, taking into account the full range and quality of the services offered by the broker-dealers, including the broker-dealers' execution capabilities, the costs of the trade, the broker-dealers' financial responsibility, the value of the research provided (if any), and their responsiveness to the manager.

In the context of fixed income, and more specifically, municipal securities, NBIA typically trades with broker-dealers other than the Program Sponsors or their designated brokers. Due to the fragmented nature of the over-the-counter municipal market, we believe best execution can be achieved by leveraging the expertise that NBIA has in this area, including, but not limited to, its extensive network of regional broker-dealers. In order to seek to ensure the best overall execution for clients, NBIA uses various market sources including third party data providers such as (but not limited to) Bloomberg, MSRB and Municipal Market Analytics, Inc. In addition, trading away from the Program Sponsor or its designated brokers allows NBIA to aggregate orders across clients' accounts, including the accounts of the Program Clients, in an effort to obtain more favorable execution, including better pricing and enhanced investment opportunities, than would otherwise be available if orders were not aggregated. We believe that using block trades may also assist in potentially avoiding an adverse effect on the price of a security that could result from simultaneously placing a number of separate, successive or competing client orders. While NBIA does not charge any additional fees or commissions when NBIA chooses to trade away from the Program Sponsor or its designated brokers, the Program Clients will generally incur mark-ups/concessions and other transaction-related charges in addition to the Program Sponsor's or designated broker's bundled fee or brokerage fee paid by each Program Client.

Given the nature of fixed income markets, we believe all participants incur similar charges related to fixed income trades that are not disclosed separately from the cost of the security. Additionally, it is increasingly common in the municipal securities market that there may be costs associated with the use of electronic trading platforms, which display bids and offerings from multiple brokers and other participants transacting in the municipal marketplace. The costs associated with transactions via these electronic platforms typically range from \$.10 to \$10 per bond, with the higher fee rate of \$10 per bond usually reserved for infrequent instances where very small lot sizes are being traded (e.g., fewer than five bonds). While any cost (i.e., the mark-ups or mark-downs built into fixed income transaction prices due to the over-the-counter nature of the market) incurred by NBIA in trading away in muni security transactions are indirectly borne by the client and incremental to the client's wrap fee, we believe that, based on the nature of the fixed income markets and a review of various Program Sponsors' Form ADV disclosures, the Program Sponsor would incur the same or similar costs, including ones relating to electronic platforms, in the muni market if the trades were placed through them and not stepped out by NBIA as these costs are a function of the market, rather than the trading entity, while potentially not having the same or similar benefit of aggregating trades among other NBIA client accounts to seek a lower overall execution cost.

For the above reasons, we believe that we can fulfill our best execution obligation while trading away from the Program Sponsor or its designated brokers for municipal securities transactions. If after considering the above information the Program Sponsor prefers to direct NBIA to trade municipal securities with the Program Sponsor or its designated broker because it believes it is better positioned to achieve best execution, please so instruct NBIA.

TABS engages in broker-to-broker step-out transactions in the ordinary course in the SMA (separately managed account) business. The step-out trade model is the accepted industry standard as it allows advisors to book block trades that include allocations to many accounts within the strategy. The executing broker then only has to match our custodian and/or broker's submission on the MSRB's Real Time Trade Management (RTTM) system rather than having to create an individual trade for each individual account. Each account receives the same price. This helps to reduce costs, make that trading process more efficient and reduce the likelihood of errors. There is no additional cost to clients for using this methodology for trading.

Spectrum Tax Advantaged	2	1	62	31	\$1,556.00	\$ 774.00	\$ 0.00

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details

Spectrum will step out to seek best execution and liquidity while obtaining best relative value and price whenever possible without moving the market given size of step out trades are not always immediately executable and required diligent monitoring to ensure execution objectives are met. There are no additional costs. Spectrum evaluates its executions using vwap and volume metrics for execution comparisons as well as relative value of securities traded versus current market conditions such as rate spreads, volume and price. Spectrum's trades are also evaluated by a third party for comparative performance purposes.

Reaves Asset Management

Long Term Value Strategy	302	302	81,732	81,732	\$6,754,244.00	\$6,754,244.00	\$ 0.00

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details

Transaction detail is for all Lockwood accounts (combined) managed by Reaves Asset Management. Trade totals are for the Lockwood execution blocks, not allocations. Best execution was achieved; there were no additional trade costs for any client or any "trade away" execution. Trade away is used to aggregate orders with other clients of Reaves.

Tandem Investment Advisors

If applicable, manager explanation of benefits sought by trading away, if benefits sought justified additional costs incurred and any other relevant details

To seek best execution for our clients, we may place your trades through broker/dealers other than those sponsoring the wrap programs in which you participate. Such trades are known as "step-outs" and unless you prohibit step-outs in written instruction to us, we will utilize step-outs when placing trades across multiple custodians to ensure our clients are not competing with one another for best execution. The broker/dealer executing a step-out trade will receive a commission paid for by each client. A client participating in a wrap program will incur this cost in addition to any cost or fee imposed by the client's custodian broker/dealer. We believe that step-outs provide execution value beyond the incremental cost. We trade with highly qualified brokers who charge competitive commission rates. The overall reasonableness of brokerage commission paid is determined based upon the quality of execution of the services performed and of the research or trading services provided. We do not recommend broker/dealers to clients in exchange for referrals, nor do we suggest that clients use directed brokerage relationships. For clients that hire us directly without a relationship with a financial advisor, we may suggest a custodian, but we do not require you to follow this suggestion. Tandem does not have any soft dollar arrangements and does not participate in principal or agency cross transactions.
